Twins Fan Name_____

On The Road: Mathematics

Rookie Math

1. Estimate the *CIRCUMFERENCE* of a baseball in inches. Circumference is the distance around the baseball.

2. Use a string and a ruler to measure the actual circumference of the baseball. Wrap the string around the baseball and then measure the length of the string that it took to go around the ball.

Fun Facts:

Every baseball used by the Twins and every Major League Baseball team is made in Costa Rica. Can you find Costa Rica on a map?

Every baseball used by the Twins and every MLB team has mud rubbed on it before the game. Why? The mud used on the baseballs is from the Delaware River in New Jersey. Can you find the Delaware River and New Jersey on a map?
